

Introducing SedonaDocs

With the release of SedonaOffice 5.0 we are pleased to introduce SedonaDocs, the fully inclusive document management add-on module for SedonaOffice. With SedonaDocs you can store any type of electronic file (PDF, Word, Excel, TIF, GIF...) and store it within a Customer's record a Vendor or a Part. Then with a simple click of the document, you can open the file for viewing.

All documents stored within the SedonaDocs system are managed through SQL Server, and are secured and protected from unauthorized viewing based on your user's security level. With SedonaDocs you will have immediate access to all your customer's files, and best of all you'll never lose a file again!

Documents are stored within a Customer's record at the Customer, Site or System levels. This allows you to store documents for the Customer at the level the document is most relevant. All documents are stored with a document type and description for easy reference. Documents can also be stored by Vendors and Parts. There is also a General Documents folder to store miscellaneous documents.

SedonaDocs Price List:

Item	Description	Amount	Monthly Support
SedonaDocs	SedonaDocs Add-on Module for SedonaOffice 5.0	\$ 6,000.00	\$ 75.00
Scanner Interface	SedonaDocs Scanner Interface*	\$ 1,500.00	\$ 25.00
